

MUSKAN BAI

AI Engineer · Generative AI · LLM Systems · Computer Vision

muskankumarimalhi13@gmail.com · 0345-0609769 · Karachi, Pakistan · [LinkedIn](#) · [GitHub](#)

OBJECTIVE

Final-year AI Engineering student who designs, builds, and ships production AI systems end-to-end — retrieval-augmented generation pipelines, real-time computer-vision models, and GPT-powered applications deployed to live users. Experienced across the full applied-AI lifecycle: data and training pipelines, model evaluation, and API-level deployment on containerized production infrastructure. Seeking an AI Engineer internship to architect and deploy applied AI systems at scale, bringing strong fundamentals and a track record of shipped, award-winning projects.

EDUCATION

BS Artificial Intelligence — Dawood University of Engineering & Technology, Karachi *Oct 2023 – Jun 2027*

TECHNICAL SKILLS

- Generative AI / LLM: RAG pipeline design, vector search, prompt engineering, agentic systems, LangChain, Hugging Face, OpenAI & Groq APIs.
- Core ML / Deep Learning: TensorFlow, Keras, PyTorch, CNNs, transfer learning, computer vision (OpenCV, MediaPipe), scikit-learn, FAISS, ChromaDB.
- Engineering & Deployment: Python, FastAPI, Docker, REST API design, SQL/SQLite, Firebase Auth, CI/CD, Git & GitHub, React/JavaScript.

EXPERIENCE

Machine Learning Track Intern — FlyRank AI Internship (Remote) *Jul 2026 – Present*

- Contributing to applied machine learning tasks and structured model-development workflows on FlyRank's ML internship track, working toward a required capstone project.
- Completing Anthropic Academy coursework in AI fluency and applied Claude development, earning verified certificates alongside track deliverables.

KEY PROJECTS

IDIP — Intelligent Document Intelligence Platform *Jul 2026*

Python · FastAPI · LangChain · FAISS · Groq (Llama 3.3) · Docker

[GitHub](#) · [Live Demo](#)

- Designed and deployed a production RAG system for PDF/DOCX question-answering, combining recursive chunking, Sentence Transformer embeddings, and a confidence-gated FAISS index for sub-100ms retrieval.
- Built a FastAPI service serving Groq's Llama 3.3 for LLM-powered answers, containerized with Docker and deployed to Hugging Face Spaces with an automated CI pipeline.

Interview Shadow AI — Collaborative Project *Jul 2026*

React · FastAPI · Firebase Auth · SQLite · GPT-5

[GitHub](#) · [Live Demo](#)

- Developed and deployed an adaptive technical-interview platform with a GPT-5-powered 15-question flow and automated scorecard feedback.
- Designed the answer-quality scoring engine and scorecard UI, and integrated Firebase Authentication with SQLite-backed interview history for persistent user sessions.

Human Pose Estimation & Activity Classification *May 2026*

MediaPipe · OpenCV · Python

[GitHub](#)

- Developed a real-time pose-estimation system (33 keypoints/frame) with EMA smoothing, achieving 96.1% activity-classification accuracy across 1,070 labeled frames.
- Designed a joint-angle-based decision engine to reliably classify standing, squatting, and hands-raised states from live video input.

CERTIFICATIONS & ACHIEVEMENTS

- 1st Place, Hackathon Winner — Saylani AI & Data Science Program (solo, deployed an AQI model in 6 hours) — Feb 2026
- Anthropic Academy Certifications — AI Fluency: Framework & Foundations, Claude 101, Claude Cowork — Jul 2026
- Generative AI Application Developer, Promising Performer — ULEFUSA / NCEAC-HEC GenAI Cohort 3 — May 2026
- Google AI Fundamentals & Data Analytics Certificates · Coursera — GenAI, Prompt Engineering, SQL, Data Viz — Jun 2026
